DETAILED ACTION

1. According to paper filed on Jan. 27, 2009, the applicants have elected group II (dendrimer of formula (I) represented by compound A8 in figure 4) with traverse for further prosecution.

2. Claims 1-8, 11-14, 17-25 and 27-30 are now pending in the application.

Response to Arguments

3. Applicant's arguments filed on Jan. 27, 2009 have been fully considered but they are not persuasive regarding restriction requirement. The examiner does not agree with the applicants arguments that the compounds of formula (I) have a common core. The type of metal, the number and types of heteroatoms present in heterocyclic groups and carbocyclic groups attached to the metal are critical for the common core of instant

dendrimer of formula (I) and furthermore, for proper structure searching. Thus, restriction requirement as indicated is proper and thereby made final.

Specification

4. On page 15, the applicants are suggested to insert a heading ---- Brief Description of Drawings ---- before describing each figure.

Claim Objections

5. Claim 25 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in alternate only. See MPEP § 608.01(n).

Claims 25 depends upon claim 24 as well as claim 1 or claim 21.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-8, 11-14, 17-25 and 27-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In compound A8 (elected group), the value of variable R is not defined.

8. Claims 1-8, 11-14, 17-25 and 27-30 are objected for containing non-elected subject matter.

Allowable Subject Matter

9. The following is a statement of reasons for the indication of allowable subject matter:

The instant organometallic dendrimer compounds of formula (I) drawn to the elected

group are allowable over the prior art since they are neither disclosed nor obvious over the prior art. In the prior art, Markham (Applied Physics Letters, cited on applicants form 1449) discloses compounds of formula 3 (see page 2646) which are closely related to the instant compounds. However, the compounds of Markham differ from the instant compounds in having unsubstituted pyridine rings instead of phenyl-substituted pyridine rings and furthermore, there is no teaching, suggestion or motivation in the prior art to modify the compounds of Markham to prepare the instant compounds.
